

Headlight Dazzle Screen - Data Sheet

Improving Driver Safety

Specification

- Galvanized expanded mesh panels prior to powder-coating
- Attaches directly to concrete barrier
- Typical screen sizes 2m long x 1.6m high
- Variable aperture design to suit site requirements
- High strength to weight ratio

Application Benefits

- Prevents headlight glare from oncoming vehicles
- Low cost to install
- No loose strands or welding of mesh prevents deterioration
- Can be retrofitted to existing concrete barriers
- Can be customised to variable concrete barrier heights
